Snow Globes

Introduction

This is a fun and messy Christmas craft resource for all of your friends and family to join in! This is a lovely calm creative activity, which can be used all year round! This resource explores making Christmas and winter themed snow globes, but you could make a summer globe with a beach scene with gold glitter to act as the warm sun shining, or an Easter bunny with fake snow!

Snow globes can be made in stages, so is perfect for those who like to be crafty but don't like to sit for too long. This is also adaptable- you can make your own models out of polymer clay, or you can choose and buy little models to put inside your snow globe. What are you going to make?

On the next page you'll find an accessible guide to the resources that you'll need for the activity.

You can watch a video of one our leaders showing you how you can use this creative activity [here](#).

Things you'll need for this activity

| | |
